

Webinar on Marfrig's Commitments

Speech by Miguel Gularte –CEO of Marfrig

Good morning everyone.

As the CEO of Marfrig, I and my whole team have the commitment and mission of the controlling shareholder and the board of directors of the company to boldly move forward.

We are aware that sustainability is not an option. It is the only option.

To advance on fundamental topics that ensure more sustainable production that respects the environment.

And to roll out an audacious plan that addresses the challenges of having traceability across our supply chain, providing our clients and consumers with transparency regarding the origin of our products.

All this as part of a vision that preserves our forests, which are an asset belonging to the entire society. For this to happen in a fair and inclusive manner, we know that we must reach out to our suppliers and this is a commitment that is part of our history that we are reaffirming now, since we believe that inclusion is the greatest ally of conservation.

To have this inclusion that conserves our biomes, it is essential that good practices are accessible to all producers and which require:

- Access to financial resources
- Technical support
- Genetic improvement
- Improvement in animal nutrition
- More efficient monitoring technologies

We are ready to seek and establish the necessary alliances to make these improvements possible.

I reiterate that we are aware of our responsibility and that we will spare no effort to face these challenges.

For this, we have a plan whose execution has our full support.

Count on Marfrig!
